

ProTech™
A MARMON RAIL TECHNOLOGY

Mobile Pressure Tank Car Cleaning System

On-Site Flare, Purge & Cleaning Solutions Done Safely by Transco Rail Services

The ProTech Mobile Pressure Tank Car Cleaning and Flare & Purge System delivers a fully integrated, on-site service designed to safely depressurize, inert, clean, inspect, and repair pressure tank cars without routing them through a fixed shop facility.

By combining nitrogen generation, vapor control, flaring, inspection, and repair into one mobile platform, we reduce downtime, minimize emissions, and return assets to service faster.

- ✓ Safe
- ✓ Versatile
- ✓ On-Site
- ✓ Sustainable

Mobile Nitrogen Generator System

Minimize Emissions. Maximize Uptime.

- Nitrogen Generator On-Site
- Expedited Return to Service
- Controlled Emissions & Vapor Management
- Fully Mobile, Fully Integrated

Proven Field Performance

This proven, field-tested solution has been successfully deployed in railyards. During cleaning of pressure tank cars, the ProTech system has delivered safe depressurization, controlled vapor management, and consistent nitrogen inerting without safety incidents or uncontrolled emissions. For customers, that means reliable performance you can trust, reduced downtime, and faster return of your assets to revenue service.

Mobile Flare Stack

From Vapor to Verified Control

- **Controlled Hydrocarbon Vapor Combustion**
- **Knockout Drum & Flame Arrestor Protection**
- **Remote Ignition for Stable Operation**
- **Reduced Emissions, Faster Turnaround**
- **Programmable Nitrogen Purities Down to 1% O₂**
